

For every drop we use, we give one back.

Working with our bottling and external partners, we estimate that the Coca-Cola system has exceeded our goal of returning to nature and communities all of the water we use in our beverages and their production.

We are giving back an estimated **115% of the water we use in our products to communities and nature.**

HERE'S HOW:

- providing safe water access
- restoring and protecting watersheds
- supporting water for productive use

*drops represent countries with projects

248
water partnership projects in
2,000
communities across 71 countries*

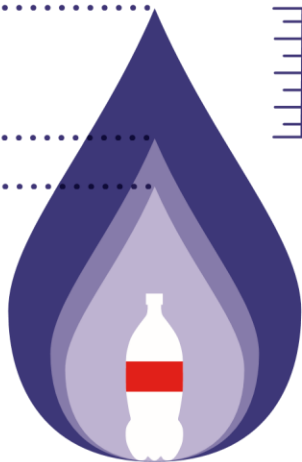

We're working to use less water per liter of product we produce each year.

2004
2.7L

2015
1.98L

2020*
1.7L

*projected based on Company goals and performance

27%
less water used per liter of product over 13 years

Product Volume Water Use:
151.1B Liters

Manufacturing Water Use:
149.09B Liters

Replenish Projects:
191.9B Liters

Treated Wastewater Returned:
145.8B Liters

Our partnership and progress to date has resulted in positive impact.

across 200+ countries have completed source vulnerability assessments of local watersheds

863
BOTTLING PLANTS

\$300+
MILLION INVESTED

in community water projects globally

187,000
HECTARES

of forest restored with native species and conserved in 20 countries

50
WATER FUNDS

in 12 countries in Africa, Latin America and the Caribbean

in partnership with World Wildlife Fund to protect fresh water resources over 9 years

50+
PROJECTS

2
MILLION

people provided sustainable, safe water access in Africa through our Replenish Africa Initiative (RAIN)

400+
PARTNERS

engaged in community water programs across 71 countries

In the coming years, we plan to continue to grow our conservation efforts and dedication to the communities we serve. To learn more and see the partners who made this possible, visit coca-colacompany.com/water.
